

## PROJECT PROPOSAL & QUOTATION

### Janani Homoeopathy — Dynamic Website

Prepared by DZ Infotech · 30 July 2026

---

#### WHAT YOU NEED

Janani Homoeopathy needs a professional, dynamic website to establish an online presence for its homoeopathic consultation practice — one where the doctor's team can independently update services and patient reviews, patients can enquire directly, and reaching the clinic on WhatsApp is a single tap away.

---

#### WHAT WE'LL BUILD

- ✓ **Dynamic Website** — Home, About, Services (all consultation categories), Doctor Profile, Reviews/Testimonials, Blog, Gallery, and Contact pages, fully responsive across mobile and desktop.
- ✓ **Admin Panel** — a self-service dashboard so the clinic can update services, reviews, doctor bio, images/banners, contact info and blog posts — no developer needed for routine changes.
- ✓ **WhatsApp Click-to-Chat Button** — a floating WhatsApp icon on every page that opens WhatsApp directly with the clinic's number pre-filled, so visitors can message in one tap.
- ✓ **Appointment / Enquiry Form** (complimentary) — patients can submit enquiries directly from the site, visible in the admin panel.
- ✓ **Domain Expiry Reminder** — built into the admin panel so the clinic is alerted before the domain lapses.

---

#### SCOPE

##### Included

- ✓ Fully responsive dynamic website (Home, About, Services, Doctor Profile, Reviews, Blog, Gallery, Contact)
- ✓ Admin panel with edit access for: services, reviews, doctor bio, images/banners, contact info, blog posts, gallery
- ✓ WhatsApp click-to-chat floating button
- ✓ Appointment/enquiry form (complimentary) with submissions visible in admin panel
- ✓ Domain expiry reminder in admin panel
- ✓ Basic on-page SEO setup
- ✓ Up to 3 rounds of revisions during development
- ✓ 1 month of free bug-fix support after go-live

##### Not Included

- ✗ Domain and hosting purchase (client will buy; DZ Infotech will configure)
- ✗ Content writing and professional photography, unless separately agreed (client-provided content preferred)
- ✗ WhatsApp Business API / broadcast messaging (this is the free click-to-chat button, not the paid API)
- ✗ Revisions beyond the 3 included rounds (billed separately if needed)
- ✗ Ongoing maintenance beyond the 1-month free support window (AMC available on request)

---

#### INVESTMENT

Total Project Cost: **₹14,000** (all-inclusive, taxes as applicable)

Third-party running costs (borne by client, separate from the build fee): domain registration and hosting.

## PAYMENT TERMS

---

- ✓ 50% advance to begin the project — ₹7,000
- ✓ 50% on delivery, before final handover — ₹7,000

## TIMELINE

---

To be finalized together at project kickoff, based on content and image availability from your side.

## HANDOVER

---

- ✓ Admin panel login credentials, with a short training walkthrough
- ✓ User manual
- ✓ Technical documentation
- ✓ Source files (design assets/images used)
- ✓ Complete code IP transferred to the client

## WHAT HAPPENS NEXT

---

Approve this proposal and share the 50% advance to begin — we'll kick off with the homepage design first so you can see the direction before we build out the full site.
