

DZ INFOTECH

PROJECT & SERVICE CATALOG

This document catalogues all the standard services and project types offered by **DZ Infotech**. *It serves as a comprehensive reference detailing the overview, key features, and target audience for each of our specialized solutions.*

1. Static Website

Overview: A lightweight, fast-loading website designed to establish a basic online presence. Ideal for small businesses, portfolios, or landing pages that do not require frequent content updates.

Key Features: Responsive design, fast load times, SEO-friendly structure, contact form integration.

Target Audience: Startups, local businesses, personal brands.

2. Dynamic Website

Overview: A fully featured website with a Content Management System (CMS) allowing the client to easily update content, blogs, and media without technical expertise.

Key Features: Admin dashboard, dynamic content rendering, blog integration, user authentication (if required), scalable architecture.

Target Audience: Growing businesses, news portals, content-heavy organizations.

3. Ecommerce Website

Overview: A comprehensive online storefront designed to sell products or services directly to consumers.

Key Features: Product catalogue management, shopping cart, secure payment gateway integration, order tracking, inventory management, customer accounts.

Target Audience: Retailers, wholesalers, D2C brands.

4. CRM (Customer Relationship Management)

Overview: A customized software solution to manage a company's interactions with current and potential customers.

Key Features: Lead tracking, sales pipeline management, meeting scheduling, automated follow-ups, performance analytics, agent portals.

Target Audience: Sales agencies, B2B companies, service providers.

5. ERP (Enterprise Resource Planning)

Overview: An integrated management system for core business processes, often updated in real-time.

Key Features: Human Resources (HRMS), Payroll, Finance and Accounting, Inventory Management, Supply Chain Management, comprehensive reporting.

Target Audience: Medium to large enterprises looking to centralize their operations.

6. AI Chatbot

Overview: Intelligent conversational agents powered by AI, designed to handle customer inquiries 24/7.

Key Features: Natural Language Processing (NLP), contextual responses, lead qualification, human-handoff, multi-platform integration (Website, WhatsApp, Messenger).

Target Audience: E-commerce, customer support centers, service businesses.

7. AI Automation

Overview: Streamlining repetitive business processes using Artificial Intelligence to save time and reduce human error.

Key Features: Workflow automation, automated data entry, intelligent document processing, predictive analytics.

Target Audience: Enterprises looking to optimize operational efficiency and reduce overhead costs.

8. WhatsApp API Integration

Overview: Leveraging the official WhatsApp Business API for automated, at-scale customer communication.

Key Features: Bulk promotional messaging, automated transactional updates (order status, appointment reminders), interactive message buttons, integrated AI chatbots.

Target Audience: Retailers, healthcare providers, event organizers, any B2C business.
